LANACANE® Fast Relief & Anti Itch Crème Medication

1. Product and company identification

Product name	: LANACANE® Fast Relief & Anti Itch Crème Medication
Distributed by	: RB Health (Canada) Inc. 1680 Tech Avenue, Unit #2 Mississauga, Ontario L4W 5S9 CANADA Telephone: +1 905 283 7000
Emergency telephone number (Medical)	: 1-800-338-6167
Emergency telephone number (Transport)	: 1-800-424-9300 (U.S. & Canada) CHEMTREC Outside U.S. and Canada (North America), call Chemtrec:703-527-3887
Website:	: http://www.rbnainfo.com
Product use	: Personal care Consumer use

This SDS is designed for workplace employees, emergency personnel and for other conditions and situations

where there is greater potential for large-scale or prolonged exposure, in accordance with the requirements of **USDOL** Occupational Safety and Health Administration.

This SDS is not applicable for consumer use of our products. For consumer use, all precautionary and first aid language is provided on the product label in accordance with the applicable government regulations, and shown in Section 15 of this SDS.

SDS #	1	D0344019 v2.0
Formulation #:	:	RD4402 v3.0

2. Hazards identification		
Classification of the substance or mixture	: Not classified	
GHS label elements		
Hazard pictograms	Not applicable.	
Signal word	: No signal word.	
Hazard statements	: No known significant effects or critical hazards.	
Precautionary statement	<u>S</u>	
General	: Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.	
Prevention	: Not applicable.	
Response	: Not applicable.	
Storage	: Not applicable.	

2. Hazards identification

Disposal	: Not applicable.
Supplemental label elements	: None known.
Hazards not otherwise classified	: None known.

3. Composition/information on ingredients

Substance/mixture : Mixture		
Ingredient name	%	CAS number
1-Hexadecanol Resorcinol	1 - 5 1 - 5	36653-82-4 108-46-3

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

4. First aid measures			
Description of necessary first aid measures			
Eye contact	: In case of contact with eyes, rinse immediately with plenty of water. If irritation persists, get medical attention.		
Inhalation	: In the event of any complaints or symptoms, avoid further exposure. Maintain an open airway. Get medical attention if adverse health effects persist or are severe.		
Skin contact	 In the event of any complaints or symptoms, avoid further exposure. Rinse skin with water. Get medical attention if symptoms occur. 		
Ingestion	: Wash out mouth with water. Get medical attention if adverse health effects persist or are severe. Do not induce vomiting. If affected person is conscious, give plenty of water to drink.		

Most important symptoms/effects, acute and delayed

Potential acute health effe	<u>cts</u>		
Eye contact	: No known significant effects or critical hazards.		
Inhalation	: No known significant effects or critical hazards.		
Skin contact	: No known significant effects or critical hazards.		
Ingestion	Harmful if swallowed. Irritating to mouth, throat and stomach.		
Over-exposure signs/symp	<u>otoms</u>		
Eye contact	: No specific data.		
Inhalation	: No specific data.		
Skin contact	: No specific data.		
Ingestion	: No specific data.		
Indication of immediate mediate	dical attention and special treatment needed, if necessary		
Notes to physician	: In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.		
Specific treatments	: No specific treatment.		
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training.		

4. First aid measures

See toxicological information (Section 11)

5. Fire-fighting measures

5 0	
Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: No specific fire or explosion hazard.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides
Special protective actions for fire-fighters	 Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.
: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
ontainment and cleaning up
: Stop leak if without risk. Move containers from spill area. Vacuum or sweep up material and place in a designated, labeled waste container.
 Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor. See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See section 13 for waste disposal information.

7. Handling and storage

Precautions for safe handling

Protective measures	:	Put on appropriate personal protective equipment (see Section 8). Avoid contact with eyes, skin and clothing. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	:	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Control

Occupational exposure limits

Ingredient name		Exposure limits	
Ingredient name Resorcinol		Exposure limits ACGIH TLV (United States, 3/2015). TWA: 10 ppm 8 hours. TWA: 45 mg/m ³ 8 hours. STEL: 20 ppm 15 minutes. STEL: 90 mg/m ³ 15 minutes. OSHA PEL 1989 (United States, 3/1989). TWA: 10 ppm 8 hours. TWA: 45 mg/m ³ 8 hours. STEL: 20 ppm 15 minutes. STEL: 90 mg/m ³ 15 minutes. NIOSH REL (United States, 10/2013). TWA: 10 ppm 10 hours. TWA: 45 mg/m ³ 10 hours.	
Poly(oxy-1,2-ethanediyl), α	-(1-oxooctadecyl)-ω-hydroxy-	STEL: 20 ppm 15 minutes. STEL: 90 mg/m ³ 15 minutes. ACGIH TLV (United States, 4/2014). TWA: 10 mg/m ³ 8 hours.	
Appropriate engineering controls : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.			
Environmental exposure controls	 tal exposure Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. 		
Individual protection measures			
 Hygiene measures Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. 			
Eye/face protection	: If operating conditions cause high du	st concentrations to be produced, use dust goggles.	
Code # : FFRD4402 (De CAN	0344019) SDS # : D0344019 v2.0	Date of issue : 16/01/2019 4/13	

8. Exposure controls/personal protection

.		
Skin	prote	ction

Hand protection	Use chemical resistant gloves classified under Standard EN374 - Protecti against chemicals and micro-organisms.	ve gloves
	Examples of preferred glove barrier materials include: Nitrile/butadiene ru or "NBR"); Chlorinated polyethylene; Butyl rubber; Polyethylene.	bber ("nitrile"
	Examples of acceptable glove barrier materials include: Natural rubber ("I Neoprene; Viton; Ethyl vinyl alcohol laminate ("EVAL").	atex");
	A glove with a protection class of 4 or higher (breakthrough time greater the minutes according to EN 374) is recommended. When only brief contact if glove with a protection class of 1 or higher (breakthrough time greater the according to EN 374) is recommended.	s expected, a
	Gloves should be replaced regularly and if there is any sign of damage to material. Always ensure that gloves are free from defects and that they ar used correctly. The performance or effectiveness of the glove may be red physical/ chemical damage and poor maintenance.	e stored and
	NOTICE: The selection of a specific glove for a particular application and use in a workplace should also take into account all relevant workplace fa but not limited to: Other chemicals which may be handled, physical require puncture protection, dexterity, thermal protection), potential body reactions materials, as well as the instructions/specifications provided by the glove Considering the parameters specified by the glove manufacturer, checks should be carried out to ensure the gloves are still retaining their protective	ctors such as, ements (cut/ s to glove supplier. during use
Body protection	Personal protective equipment for the body should be selected based on performed and the risks involved and should be approved by a specialist handling this product.	
Other skin protection	Appropriate footwear and any additional skin protection measures should based on the task being performed and the risks involved and should be a specialist before handling this product.	
Respiratory protection	None required. However, use of adequate ventilation is good industrial pra	actice.

9. Physical and chemical properties

<u>Appearance</u>		
Physical state	:	Solid.
Color	:	White
Odor	:	Odorless.
Odor threshold	:	Not available.
рН	:	4.2 to 5.8 [Conc. (% w/w): 100%]
Melting point	:	Not available.
Boiling point	:	Not available.
Flash point	:	Not available.
Evaporation rate	:	Not available.
Flammability (solid, gas)	:	Not available.
Lower and upper explosive (flammable) limits	:	Not available.

9. Physical and chemical properties

Vapor pressure	: Not available.
Vapor density	: Not available.
Relative density	: 0.95 to 1.05
Solubility	: Easily soluble in the following materials: cold water and hot water.
Partition coefficient: n- octanol/water	: Not available.
Auto-ignition temperature	: Not available.
Decomposition temperature	: Not available.
Viscosity	: Dynamic (room temperature): 350000 to 1000000 mPa·s (350000 to 1000000 cP)
Flow time (ISO 2431)	: Not available.

10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: No specific data.
Incompatible materials	: Do not use with other products.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

13. Disposal considerations

Disposal methods	: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and
	sewers.
