: Air care, continuous action (solid and liquid)

This SDS is designed for workplace employees, emergency personnel and for other conditions and situations where there is greater potential for large-scale or prolonged exposure, in accordance with the requirements of USDOL Occupational Safety and Health Administration.

This SDS is not applicable for consumer use of our products. For consumer use, all precautionary and first aid language is provided on the product label in accordance with the applicable government regulations, and shown in Section 15 of this SDS.

| SDS #         | : D8371584 v1.0 |
|---------------|-----------------|
| Formulation # | : 3123241 v1.0  |

|--|-----|---|
| GHS label elements<br>Hazard pictograms    | :   |   |
| Signal word                                | : \ | Warning   |

| 2. Hazards identification           |  |  |
|-------------------------------------|--|--|
| Hazard statements                   | : Causes serious eye irritation.<br>Causes skin irritation.<br>May cause an allergic skin reaction.  |  |
| Precautionary statement             | <u>s</u>   |  |
| General                             | : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.  |  |
| Prevention                          | : Wear protective gloves. Wear eye or face protection. Avoid breathing vapor. Wash hands thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.   |  |
| Response                            | : IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention. |  |
| Storage                             | : Not applicable.  |  |
| Disposal                            | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |  |
| Supplemental label elements         | : None known.  |  |
| Hazards not otherwise<br>classified | : None known.  |  |

# 3. Composition/information on ingredients

| _ | N /       |
|---|-----------|
|   | Mixture   |
|   | IVIIALUIC |

| Ingredient name                            | %         | CAS number |
|--|-----------|------------|
| Isopropyl myristate                        | ≥10 - ≤18 | 110-27-0   |
| Citral                                     | <1        | 5392-40-5  |
| Linalool                                   | <1        | 78-70-6    |
| Allyl cyclohexanepropionate                | <1        | 2705-87-5  |
| 2,4-Dimethyl-3-cyclohexen-1-carboxaldehyde | <1        | 68039-49-6 |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

## 4. First aid measures

Substance/mixture

| Description of necessary first aid measures |  |  |  |
|---|--|--|--|
| Eye contact                                 | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10<br/>minutes. Get medical attention.</li> </ul>  |  |  |
| Inhalation                                  | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If<br>not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial<br>respiration or oxygen by trained personnel. It may be dangerous to the person providing<br>aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects<br>persist or are severe. If unconscious, place in recovery position and get medical<br>attention immediately. Maintain an open airway. Loosen tight clothing such as a collar,<br>tie, belt or waistband. |  |  |
| Skin contact                                | : Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |  |  |

Ingestion

### 4. First aid measures Ingestion : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. Most important symptoms/effects, acute and delayed Potential acute health effects Eye contact : Causes serious eye irritation. Inhalation : No known significant effects or critical hazards. Skin contact : Causes skin irritation. May cause an allergic skin reaction. Ingestion : No known significant effects or critical hazards. **Over-exposure signs/symptoms** Eye contact : Adverse symptoms may include the following: pain or irritation watering redness Inhalation : No specific data. Skin contact : Adverse symptoms may include the following: irritation redness

Indication of immediate medical attention and special treatment needed, if necessaryNotes to physician: Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.Specific treatments: No specific treatment.Protection of first-aiders: No action shall be taken involving any personal risk or without suitable training. It may<br/>be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash<br/>contaminated clothing thoroughly with water before removing it, or wear gloves.

: No specific data.

### See toxicological information (Section 11)

## 5. Fire-fighting measures

| Extinguishing media                        |  |
|--|--|
| Suitable extinguishing media               | : Use an extinguishing agent suitable for the surrounding fire.                                    |
| Unsuitable extinguishing media             | : None known.  |
| Specific hazards arising from the chemical | : No specific fire or explosion hazard.  |
| Hazardous thermal decomposition products   | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide |

# 5. Fire-fighting measures

| Special protective actions<br>for fire-fighters | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
|---|---|---|
| Special protective equipment for fire-fighters  | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.                         |

# 6. Accidental release measures

| Personal precautions, protect  | tive equipment and emergency procedures   |
|--------------------------------|---|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.  |
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |
| Methods and materials for co   | entainment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# 7. Handling and storage

| Precautions for safe handling                                      | L |  |
|--|---|--|
| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

# 8. Exposure controls/personal protection

**Control** 

### **Occupational exposure limits**

| Ingredient name                  |  | Exposure limits   |
|----------------------------------|--|---|
| Citral                           |  | ACGIH TLV (United States, 3/2018).<br>Absorbed through skin. Skin sensitizer.<br>TWA: 5 ppm 8 hours. Form: Inhalable<br>fraction and vapor  |
| Appropriate engineering controls | : Good general v contaminants.   | entilation should be sufficient to control worker exposure to airborne  |
| Environmental exposure controls  | they comply wit<br>cases, fume sci                                     | ventilation or work process equipment should be checked to ensure<br>in the requirements of environmental protection legislation. In some<br>subbers, filters or engineering modifications to the process equipment<br>by to reduce emissions to acceptable levels.   |
| Individual protection measu      | <u>ires</u>  |   |
| Hygiene measures                 | eating, smoking<br>Appropriate tec<br>Contaminated v<br>contaminated c | rearms and face thoroughly after handling chemical products, before<br>and using the lavatory and at the end of the working period.<br>nniques should be used to remove potentially contaminated clothing.<br>vork clothing should not be allowed out of the workplace. Wash<br>othing before reusing. Ensure that eyewash stations and safety<br>se to the workstation location. |
| Eye/face protection              | assessment ind gases or dusts.   | complying with an approved standard should be used when a risk<br>icates this is necessary to avoid exposure to liquid splashes, mists,<br>If contact is possible, the following protection should be worn, unless<br>indicates a higher degree of protection: chemical splash goggles.   |
| Skin protection                  |  |   |
| Hand protection                  | the gloves are s<br>to breakthrough<br>manufacturers.                  | parameters specified by the glove manufacturer, check during use that<br>till retaining their protective properties. It should be noted that the time<br>for any glove material may be different for different glove<br>In the case of mixtures, consisting of several substances, the protection<br>es cannot be accurately estimated.   |
| Body protection                  |  | tive equipment for the body should be selected based on the task being<br>the risks involved and should be approved by a specialist before<br>oduct.  |
| Other skin protection            | based on the ta  | twear and any additional skin protection measures should be selected<br>sk being performed and the risks involved and should be approved by a<br>handling this product.   |
| Respiratory protection           | appropriate star   | azard and potential for exposure, select a respirator that meets the<br>ndard or certification. Respirators must be used according to a<br>ection program to ensure proper fitting, training, and other important   |

# 9. Physical and chemical properties

| <u>Appearance</u> |                               |                 |               |            |      |
|-------------------|-------------------------------|-----------------|---------------|------------|------|
| Physical state    | : Liquid.                     |                 |               |            |      |
| Color             | : Not available.              |                 |               |            |      |

### Aerosol product

| 10. Stability and reactivity       |  |  |  |  |
|------------------------------------|--|--|--|--|
| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |  |  |  |
| Chemical stability                 | : The product is stable.   |  |  |  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |  |  |  |
| Conditions to avoid                | : No specific data.  |  |  |  |
| Incompatible materials             | : No specific data.  |  |  |  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |  |  |  |

# 11. Toxicological information

## Information on toxicological effects

### Acute toxicity

| Product/ingredient name     | Result      | Species | Dose       | Exposure |
|-----------------------------|-------------|---------|------------|----------|
| Isopropyl myristate         | LD50 Dermal | Rabbit  | 5 g/kg     | -        |
| Citral                      | LD50 Dermal | Rabbit  | 2250 mg/kg | -        |
|                             | LD50 Oral   | Rat     | 3.45 g/kg  | -        |
| Linalool                    | LD50 Dermal | Rabbit  | 5610 mg/kg | -        |
|                             | LD50 Dermal | Rat     | 5610 mg/kg | -        |
|                             | LD50 Oral   | Rat     | 2790 mg/kg | -        |
| Allyl cyclohexanepropionate | LD50 Oral   | Rat     | 585 mg/kg  | -        |

**Conclusion/Summary** : Based on available data, the classification criteria are not met.

## 13. Disposal considerations

### **Disposal methods**

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## 16. Other information

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

National Fire Protection Association (U.S.A.)

NFPA (30B) aerosol Flammability No known significant effects or critical hazards.

Copyright ©2001, National Fire Protection Association, Quincy, MA 02269. This warning system is intended to be interpreted and applied only by properly trained individuals to identify fire, health and reactivity hazards of chemicals. The user is referred to certain limited number of chemicals with recommended classifications in NFPA 49 and NFPA 325, which would be used as a guideline only. Whether the chemicals are classified by NFPA or not, anyone using the 704 systems to classify chemicals does so at their own risk.
