Relevant identified uses o	f the substance or mixture and uses advised against
Identified uses	
Dish wash	

#### 2. Hazards identification **Classification of the** : SKIN IRRITATION - Category 2 substance or mixture **EYE IRRITATION - Category 2A GHS** label elements Hazard pictograms Signal word : Warning Hazard statements : Causes skin irritation. Causes serious eye irritation. **Precautionary statements** General : Not applicable. : Wash hands thoroughly after use **Prevention** Response : IF ON SKIN: Wash with plenty of water. If skin irritation occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention. : Not applicable. Storage **Disposal** : Not applicable. Supplemental label : None known. elements Hazards not otherwise : None known. classified

# 3. Composition/information on ingredients

N Alixati uma

Substance/mixture : Mixture		
Ingredient name	%	CAS number
Silicic acid, sodium salt potassium hydroxide sodium hypochlorite	10 - 30 1 - 5 1 - 5	1344-09-8 1310-58-3 7681-52-9

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

# 4. First aid measures

<b>Description of necess</b>	sary first aid measures
Eye contact	<ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.</li> </ul>
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

	D0250346	v5.0
--	----------	------

# 4. First aid measures

Skin contact	: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	: Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

#### Most important symptoms/effects, acute and delayed

Potential acute health effects	
Eye contact	Causes serious eye irritation.
Inhalation	No known significant effects or critical hazards.
Skin contact	Causes skin irritation.
Ingestion	No known significant effects or critical hazards.
Over-exposure signs/sympto	<u>ms</u>
Eye contact	Adverse symptoms may include the following: pain or irritation watering redness
Inhalation	No specific data.
Skin contact	Adverse symptoms may include the following: irritation redness
Ingestion	No specific data.
Indication of immediate medic	al attention and special treatment needed, if necessary
Notes to physician	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	No specific treatment.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

#### See toxicological information (Section 11)

5. Fire-fighting me	easures
Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: No specific fire or explosion hazard.

# 5. Fire-fighting measures

Hazardous thermal decomposition products	: No specific data.
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

# 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	vacuate surro itering. Do no ovide adequa	be taken involving any personal risk or without suitable training. Unding areas. Keep unnecessary and unprotected personnel from ot touch or walk through spilled material. Avoid breathing vapor or mist. te ventilation. Wear appropriate respirator when ventilation is t on appropriate personal protective equipment.
For emergency responders	•	othing is required to deal with the spillage, take note of any information in itable and unsuitable materials. See also the information in "For non-sonnel".
Environmental precautions	d sewers. In	of spilled material and runoff and contact with soil, waterways, drains form the relevant authorities if the product has caused environmental rs, waterways, soil or air).

#### Methods and materials for containment and cleaning up

Small spill	: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# 7. Handling and storage

#### Precautions for safe handling

Protective measures

: Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

# 7. Handling and storage

Conditions for safe storage,	1	Store in accordance with local regulations. Store in original container protected from
including any		direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials
incompatibilities		(see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

# 8. Exposure controls/personal protection

С	or	ıtr	ol
-			<u>.</u>

Ingredient name	Exposure li	mits		
potassium hydroxide	C: 2 mg/m <sup>3</sup> OSHA PEL CEIL: 2 mg NIOSH REL	ACGIH TLV (United States, 3/2018). C: 2 mg/m <sup>3</sup> OSHA PEL 1989 (United States, 3/1989). CEIL: 2 mg/m <sup>3</sup> NIOSH REL (United States, 10/2016). TWA: 2 mg/m <sup>3</sup> 10 hours.		
sodium hypochlorite solutio		AIHA WEEL (United States, 5/2018). STEL: 2 mg/m <sup>3</sup> 15 minutes.		
Appropriate engineering controls	Good general ventilation should be sufficient to contro contaminants.	ol worker exposure to airborne		
Environmental exposure controls	Emissions from ventilation or work process equipment they comply with the requirements of environmental p cases, fume scrubbers, filters or engineering modification will be necessary to reduce emissions to acceptable la	rotection legislation. In some ations to the process equipment		
ndividual protection meas				
Hygiene measures	Wash hands, forearms and face thoroughly after hand eating, smoking and using the lavatory and at the end Appropriate techniques should be used to remove pot Wash contaminated clothing before reusing. Ensure showers are close to the workstation location.	l of the working period. tentially contaminated clothing.		
Eye/face protection	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.			
Skin protection				
Hand protection	Considering the parameters specified by the glove mathe the gloves are still retaining their protective properties to breakthrough for any glove material may be different manufacturers. In the case of mixtures, consisting of time of the gloves cannot be accurately estimated.	. It should be noted that the time nt for different glove		
Body protection	Personal protective equipment for the body should be performed and the risks involved and should be appro- handling this product.			
Other skin protection	Appropriate footwear and any additional skin protectic based on the task being performed and the risks invo specialist before handling this product.			

# 8. Exposure controls/personal protection

```
Respiratory protection
```

: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

# 9. Physical and chemical properties

Ap	pe	ara	Inc	e
_	_			

Physical state	: Liquid.
Color	: Blue
Odor	: Not determined
Odor threshold	: Not determined
рН	: 10.3 to 11
Melting point	: Not determined
Boiling point	: Not determined
Flash point	: Closed cup: 100°C (212°F) [flash point value based on ingredient data]
Evaporation rate	: Not determined
Flammability (solid, gas)	: Not determined
Lower and upper explosive (flammable) limits	: Not determined
Vapor pressure	: Not determined
Vapor density	: Not determined
Relative density	: 1.15 to 1.2
Solubility	: Not determined
Partition coefficient: n- octanol/water	: Not determined
Auto-ignition temperature	: Not determined
Decomposition temperature	: Not determined

# 10. Stability and reactivity

Reactivity	:	No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	:	The product is stable.
Possibility of hazardous reactions	:	Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	:	No specific data.
Incompatible materials	:	No specific data.
Hazardous decomposition products	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

# 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
1 5	LD50 Oral LD50 Oral		273 mg/kg 1100 mg/kg	-

#### **Conclusion/Summary** : Based on available data, the classification criteria are not met. **Irritation/Corrosion**

Product/ingredient name	Result	Species	Score	Exposure	Observation
Silicic acid, sodium salt	Eyes - Severe irritant	Rabbit	-	24 hours 10 milligrams	-
	Skin - Severe irritant	Rabbit	-	24 hours 500 milligrams	-
potassium hydroxide	Eyes - Moderate irritant	Rabbit	-	24 hours 1 milligrams	-
	Skin - Severe irritant	Guinea pig	-	24 hours 50 milligrams	-
	Skin - Severe irritant	Human	-	24 hours 50 milligrams	-
	Skin - Severe irritant	Rabbit	-	24 hours 50 milligrams	-
sodium hypochlorite solution CI active	Eyes - Mild irritant	Rabbit	-	1.31 milligrams	-
	Eyes - Moderate irritant	Rabbit	-	10 milligrams	-

#### **Conclusion/Summary**

Skin Eyes			on Method: Causes skin irritation. on Method: Irritating to eyes.
Respiratory			data, the classification criteria are not met.
Sensitization Not available.			
Conclusion/Summary			
Skin	: Based of	on available o	data, the classification criteria are not met.
Respiratory	: Based of	on available o	data, the classification criteria are not met.

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects	: No known sigr	ificant effects or critical hazards.	

### 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### 14. Transport information

	DOT Classification	<b>TDG Classification</b>	IMDG	ΙΑΤΑ
UN number	Not regulated.	Not regulated.	Not regulated.	Not regulated.
UN proper shipping name	-	-	-	-
